Summary

Frontend Engineer with **2+** years of experience building production SaaS products used by **4,500+** users. Currently leading the frontend of Montage, an AI video platform. Focused on shipping scalable, performant, and user focused interfaces with **Next.js**, **React.js**, **TypeScript**, **Shadcn UI** and **Tailwind CSS**.

Work Experience

Frontend Engineer | Montage (previously Ukumi.ai) (Feb 2025 - Present)

- Leading end to end frontend development of Montage, an AI video tool that converts long form video into short polished clips.
- Architected the complete frontend from scratch including component system, state management, interactive clip editor, word level caption control, and 9:16 reframe workflow.
- Led the frontend through a full product pivot from Ukumi.ai to Montage. Montage is live in beta used by **2,000+** users.

Software Developer - 1 | Techype (Aug 2024 - Feb 2025)

- Owned the frontend of Maple Drive, a US based recruitment SaaS, as the sole frontend engineer.
- Engineered a real time recruiter to candidate messaging system.
- Integrated **Stripe** payments and **Cal.com** scheduling to deliver a complete hiring workflow.
- Platform reached **2,500+** active users during tenure.

Software Developer intern | Techype (Feb 2024 - Jul 2024)

- Shipped across three live client products including admin dashboards, a fintech investment platform, and KYC and payment gateway integrations.
- Built responsive admin dashboards with data visualization for internal decision making.
